

DSFT FEDERAL

CYBERSECURITY · ATO EXECUTION · SDVOSB

CAPABILITY STATEMENT

Operator-Led RMF, ATO & Continuous Monitoring Support

SDVOSB (SBA-Certified) · Active TS / CISSP Principal · RMF / ATO Specialists

DSFT Federal, founded in 2026, executes Risk Management Framework end-to-end: Initial planning, building authorization packages, ISSM/ISSO ownership, and continuous monitoring efforts. DSFT Leadership has a wide breadth of experience managing personnel and DoD systems spanning enterprise logistics, military-health networks, Special Access Programs, and Operational Technologies.

CORE COMPETENCIES

- **RMF / ATO / ATC:** NIST SP 800-53 Authorization and Assessment. Execution from system planning to decommission.
- **ISSM / ISSO:** Security-role ownership, eMASS management, evidence coordination, vulnerability remediation and audit response.
- **Continuous Monitoring:** Custom Information System Continuous Monitoring Plans (ISCM). Automation of ISCM Tasks.
- **Classified Authorization:** Experience operating in Intelligence and Operational Environments.

WHAT DSFT BRINGS TO YOUR TEAM

- **Roles We Fill:** ISSM · ISSO · RMF/Cyber Analyst · Network Engineers · Helpdesk · Tier 2 support Junior Developers
- **Staffing & Surge Capability:** A dedicated capture and hiring lead to source IT/Cyber talent on demand to scale to contract need.
- **Custom Automation:** Purpose-built Bash/PowerShell tuned to each system configuration; works natively in gov't environments.
- **Agility and Low Overhead:** As a new company, DSFT operates lean and fast. Lower cost, less bureaucracy, faster pivots.
- **GFE-Native Delivery:** Able to perform directly on government systems for the cleanest data handling and turnover.
- **Compliance Posture:** Active TS principal can execute cleared work now under the prime's FCL. No CUI to date; no SPRS score.
- **SDVOSB Goal Credit:** DSFT advances your SDVOSB and SB subcontracting goals while adding cyber authorization depth.

KEY PERSONNEL

Record below is the principal's personal federal performance

Jason Debelevich - President & CEO / Technical Director • USAF Veteran • Active TS (SCI/SAP Eligible) • CISSP • 18 YoE

- **AF Enterprise Scale:** Led the NIST 800-53 Rev 5 transition for a USAF enterprise system of record, expanding its control baseline from ~50 to 800+ controls. Tested 4400 custom test procedures and created 120 new ISCM tasks in nine months.
- **Military health:** Led the initial ATO, sustainment, and Rev 5 transition of a DoD military-health network supporting 13 accredited medical devices and subnetworks; earned the top maturity rating (ML-4) on two consecutive triennial cyber inspections.
- **Special Access Programs:** Cybersecurity lead for a Special Access Program (SAP). Authored the implementation documentation in accordance with JSIG and led a four-person team to pass a MAJCOM cyber inspection within the first 60 days on site.
- **Operational Technology:** ISSM for a USAF training range, integrating OT/ICS across flight simulators, tactical datalinks, SCADA controllers, and RF systems. Separately, performed technical evaluation of a joint logistics program device to field \$16M of lab equipment that had sat shelved for nearly three years.
- **Authorization-boundary Consulting:** Petitioned PMO and AO to eliminate standalone ATO requirements for two systems by folding them into existing boundaries; reduced sustainment cost by ~\$800K/yr and avoided ~\$2.5M in one-time code refactoring.

Ryan Sykora – Executive Vice President, Business Development & Capture

- **Hiring and Recruiting:** 12 years of experience leading and staffing sales teams. Responsible for market research, HR, and hiring.
- **Business Capture:** Built DSFT's opportunity dashboard. Pulls all relevant RFIs, RFPs, and expiring contracts daily, sorted using a custom priority system. Allows for rapid outreach and response to both small prime and new subcontracting opportunities.
